Objective

- The objective of this project is to develop a Blood Bank Management System (BBMS) to simplify and automate the process of searching for blood incase of emergency and maintain the records of blood donors, recipients, blood donation programs and blood stocks in the bank.

Abstract

This presentation proposal outlines the development of a Blood Bank Management System (BBMS). The necessity of a blood bank is due to the scarcity of rare blood group and unavailability of blood during emergency. Patients don't know where to search for blood during emergency cases. Most of the existing blood bank is still maintained in manual systems. This operation is tedious, time consuming and space consuming. This project aims to make all the procedures automated and therefore with computer systems it will be fast and accurate. It will have features like Donor Registration, Donor List, Stock blood list, Exchange blood list, Blood donation programs managed by an admin. Users can register for blood or if they want to make request for blood online or exchange blood they can take help of this site. The proposed solution incorporates a range of technologies, including HTML, CSS, JavaScript, Java Struts2, and MySQL, to ensure a robust and efficient application.

- Login Page

A mockup of a web browser window displaying a login page. The browser's address bar shows the URL `https://www.maiabloodbank.com/login`. The page content is centered and titled "Login Now". It features a "Sign In" section with an "Email:" label, a text input field containing the placeholder "Enter Email", a "Password:" label, and a password input field with masked characters. Below these fields is a blue "SIGN IN" button. A link labeled "Forgot Password?" is positioned below the button. The "New User" section includes a blue "Register" button. The browser window has a tab labeled "Page 1" and standard navigation icons.

- Registration Page

A mockup of a web browser window displaying a user registration form. The browser's address bar shows the URL "https://www.maiabloodbank.com/registration". The form is titled "USER REGISTRATION" in red, bold text. It contains several input fields for user information: Full Name, Contact Number, Email, Age, Gender, Blood Group, Address, Password, and Confirm Password. A blue "Register" button is positioned at the bottom right of the form.

- Login Page

A mockup of an Admin Login page displayed within a web browser window. The browser's address bar shows the URL `https://www.maiabloodbank.com/admin`. The page title is "Page 1". The login form is titled "Admin Login" and contains the following elements:

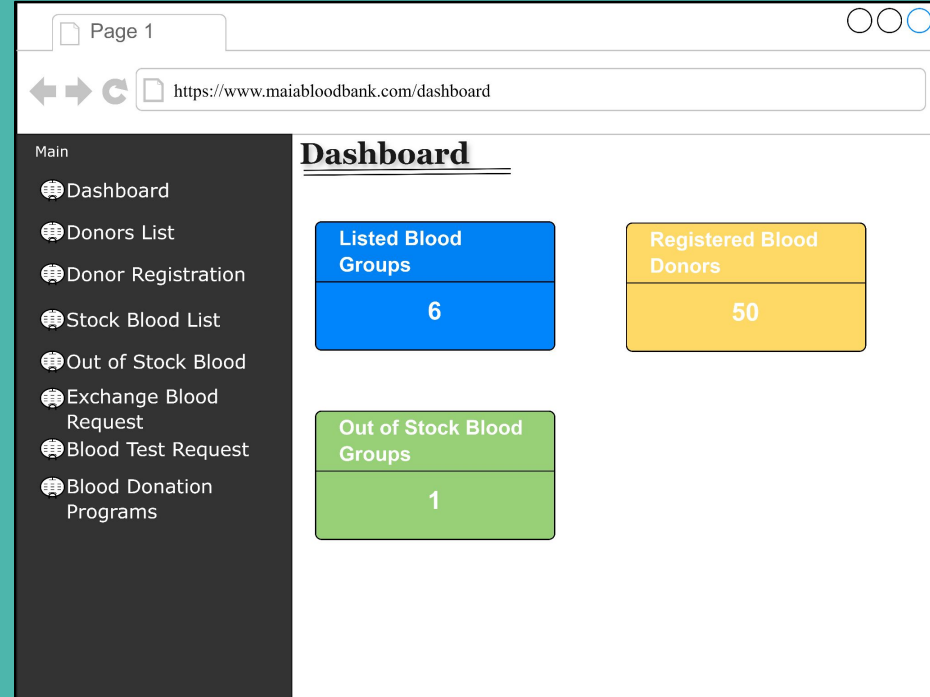

- A "Sign In" label above the input fields.
- A "Username:" label followed by a text input field containing the placeholder text "Enter Email".
- A "Password:" label followed by a password input field with masked characters (dots).
- A blue "SIGN IN" button.
- A link labeled "Forgot Password?" below the password field.

The mockup shows a web browser window with the address bar displaying `https://www.maiabloodbank.com/searchdonor`. The page title is "Page 1". The navigation menu includes buttons for "Home", "About", "Donor List", "Search Donor" (highlighted with a red border), "Exchange Blood", "Blood Test", "Login", and "Admin". Below the navigation menu, the breadcrumb "Home/Search Donor" is visible. The main heading is "-Search Donor-" in red, followed by three dots. The form contains three input fields: "Blood Group*" with a dropdown menu showing "O+", "Location" with a text input field, and "Gender" with a dropdown menu showing "F". A blue "Search" button is located at the bottom of the form.
